Fastest organic combined broiler fattener supplement

Benefits of supplement

This supplement boosts feed intake, and feed conversion efficiency since it improves feed palatability and digestion thus making chickens feed more with the ability to convert feeds into muscles. Additionally, a combination of these powders boosts carcass yield hence generating more profits. It also boosts fertility in breeder chickens by boosting sperm quality in roosters. The powder further boosts chicken body immunity by killing harmful bacteria as well as boosting weight gain since it contains more nutrients.

Preparation steps

To prepare the supplement start by obtaining good quality neem and pumpkin seeds, dry them, and thereafter grind them well into powder. Thereafter, preparation of these two powders mix them together in a ratio of 1:1 and add 10g of mixture per kg of feeds.
