HOW TO MAKE BEANS FLOUR/BEANS POWDER

Bean processing

When processing, drain water from beans and repeat the process until skin is off and rinse beans with clean water after removing skin and transfer beans inside tray and spread t out and dry it under sun. Turn beans regularly for uniform drying and transfer dried beans into a blender to blend it into powder form.
Similarly, transfer poder to a bowl or tray and spread it to coo down and finally store powder in an airtight container and store.
