Pepper powder organic weight supporter in broiler farming

Pepper benefits

Pepper improves digestion, feed intake, and boosts feed conversion efficiency in broiler birds. Additionally, it also boosts body weight, reduces stress, improves carcass and broiler meat quality. Furthermore, pepper powder also acts as a preservative in broiler meat thus increasing meat availability on markets.

Preparation process

To prepare pepper powder start by obtaining good quality pepper and clean them properly, thereafter dry and grind the cleaned pepper into powder. Furthermore, after the preparation process add 1 kilogram of the pepper powder for every 100 kilogram of broiler chicken feeds.
