Raising chicken without death using aloevera and garlic mixture for faster growth and more egg laying

Garlic and aloe vera benefits

These natural extracts are beneficial as they increase feed intake, boost body immunity, and enhance microbial growth which inhibits the growth of pathogenic bacteria which may cause diseases. Additionally, they also promote good gut bacteria as well as enhance feed conversion ratio hence faster growth.

Herbs preparation

Start by collecting aloe Vera gel extract in a clean container. Thereafter separate garlic cloves and remove the outer dry covering. Furthermore, smash the garlic cloves to obtain a paste and spread it on a tray, and dry to dry for 4 days under the sun.
